Subject: Request

Dear all,

I am a WWII aviation collector from Switzerland. I focus mainly on personal gear from aviators. I am proud owner of a few parachutes, such as the B-8 pack-type, the AN-6510 seat type, and the A-4 QAC-type.

I stepped over your great website which gave me the courage to write you this Email.

I recently found a Parachute Rigger Kit 6540 as a perfect addition to the parachute collection. Since I am not a specialist in this type of tools, I would like to ask you the following questions:

- Is this kit complete (see the picture with all the contents)?
- Can you give a approximate date of the kit?
- Is there a way to get a manual how to use the kit, means what are the tools for?

Please email any information you may be able to provide to: jkuehni@swissonline.ch

Thank you for your help and kind regards from Switzerland,

Jürg Kühni
